Contrast

Emergency call Assistance button, universal remote control

Rug and clutter free, and adequate circulation space

Electrical cord clips and socket cover

Entertainment and reminiscence products
Movies, music, games, digital photo frame, life history books, talking photo album

These are common issues a person with dementia may experience in the lounge room:

Independence

- remembering where things are
- using the phone

Safety and security

- calling for help
- reducing electrical hazards

Leisure and lifestyle

- using entertainment devices and stimulating the brain

Person Centred Response and Ethics

When considering and introducing new technology or changes in the home it is important to keep in mind how the person with dementia relates to their environment. Make sure your strategies are person centred, ethical and respect the rights and needs of the individual. Where possible, involve them in the decision making process and test the item with them.
